systems for safety and efficiency - exhange server

Phicom ®

extreme communication

construction

Real time information is critical for real time decisions. Where individual operators need to communicate as a group and have access to other communication mediums - the Phicom exchange server can provide this gateway.

The Exchange Server Provides:

- Full duplex group communication for up to 8 users (standard)
- Interface to remote communications equipment (PMR - Tetra - P25)
- Remote control (PTT) and access to vehicle radios
- Long battery life - up to 12 hours operation
- Master Control to select specific users
- Automatic call return
- Secure Digital Communications
- Optional AES Encryption
- Optional accessories

Applications

- Emergency rescue co-ordination
- Fire control management
- Construction Industry management - cranes
- Electrical lines people
- Applications requiring real time control

system example
